MANAGEMENT PLAN**

**PART IV, APPENDIX 1
CONTAMINATED WATER MANAGEMENT PLAN**

§330.207 CONTAMINATED WATER MANAGEMENT

§330.207(a) Disposal of Liquids

Liquids will not be routinely generated from the operations at this facility. This facility will transfer and store waste packaged in accordance with Texas Commission on Environmental Quality 30 TAC §330.1207, United States Department of Transportation 49 CFR §178, and Occupational Safety and Health Administration 29 CFR §1910.

Working surfaces coming into contact with untreated medical waste is not anticipated unless a spill occurs. In the event of a spill, the waste will be collected and packaged in accordance with the packaging requirements for untreated medical waste. Working surfaces, including containers, contacted by untreated medical waste will be cleaned/sanitized. Wash waters generated from the cleaning and/or sanitation of surfaces in contact with untreated medical waste will be absorbed and/or collected and managed as untreated medical waste. This manner of management of wash water/contaminated water will not cause surface water or groundwater pollution.

Waters not generated from the cleaning/sanitation of surfaces in contact with untreated medical waste (i.e. water from restroom, office area) will be discharged to the City of El Paso sanitary sewer system. A discharge permit is not required for this type of discharge.

No contaminated water will be discharged off-site without specific written authorization.

§330.207(b) Collection of Contaminated Water and Leachate

Waste will be stored inside an enclosed transport truck/trailer and/or enclosed storage building. Therefore, no contaminated water or leachate will occur outside of the storage unit(s) and collection units will not be required.

§330.207(c) Use of Leachate and Gas Condensate

This section is not applicable to this Type V MSW Facility.

§330.207(d) Discharge to a Septic System

This section is not applicable to this Type V MSW Facility.

§330.207(e) Off-Site Discharge of Contaminated Waters

No contaminated water will be discharged off-site without specific written authorization under Texas Pollutant Discharge Elimination System (TPDES) authority.

§330.207(f) Wastewaters Discharges to Treatment Facility

Wastewaters from waste transfer and storage operations at this Type V MSW Facility will not be discharged to a treatment facility. Therefore, this section is not applicable.

§330.207(g) Oil & Grease Concentration in Effluent

Waste transfer and storage operations at this Type V MSW Facility will not result in effluent to a public sewer system. Only water from restroom and office area will be discharged to the City of El Paso sanitary sewer system. Therefore, this section is not applicable to this facility.

§330.207(h) Liquid Waste Transfer Facilities

This facility is not a liquid waste transfer facility, therefore §330.207(h) is not applicable to this Type V MSW Facility.
